4D STRETCH is the latest fabric to be added to our high performance range. The 4D stretch is designed to work with the natural movement planes of the human body, as a result there will never be any restriction for the athlete.

HIGH TWIST POLYESTER TWILL is a strong material made for full contact sports. The silicone gripping tape around the inside of the waist holds the garment in place. The lycra gusset allows for freedom of movement to run and stretch. Perfect for sublimation.
